EDITORIAL POLICY

At a conference in Fredrikshavn in
1997 a new network - Nordic Network
on Disability Research - was established.
One of the purposes of this network is
to establish a journal in English about
social research on disability: Scandina-
vian Journal of Disability Research. Its
main purpose is to disseminate results
from social research on disability.
"Social research" is - in this context -
understood as a cross-disciplinary field
including for example educational,
sociological, socio-psychological, historical
legal, economical, socio-medical research.
Its defining characteristic is a focus on
the relation between persons with dis-
abilities and their environments in a
broad sense. Although the ambition
primarily is to encourage Scandinavian
researchers to submit articles for publi-
cation, the Journal welcomes articles
from all over the world.
