EDITORIAL POLICY

At a conference in Fredrikshavn in 1997 the
Nordic Network on Disability Research - was
established. One of the purposes of this network is
to publish a journal in English about social
research on disability: Scandinavian Journal of
Disability Research. Its main purpose is to
disseminate results from social research on
disability. "Social research" is - in this context -
understood as a cross-disciplinary field
including for example educational, sociological,
socio-psychological, historical legal, economical,
socio-medical research. Its defining characteristic
is a focus on the relation between persons with
disabilities and their environments in a broad
sense. Although the ambition primarily is to
encourage Scandinavian researchers to submit
articles for publication, the Journal welcomes
articles from all over the world.

Jan Tøssebro, Editor
