**EDITORIAL POLICY**

At a conference in Fredrikshavn in 1997 the Nordic Network on Disability Research was established. One of the purposes of this network is to publish a journal in English: The Scandinavian Journal of Disability Research. Its main purpose is to disseminate results from social research on disability. "Social research" is - in this context - understood as a cross-disciplinary field including for example educational, sociological, socio-psychological, historical, legal, economical and socio-medical research. Its defining characteristic is a focus on the relation between persons with disabilities and their environments in a broad sense. Although the ambition primarily is to encourage Scandinavian researchers to submit articles for publication, the Journal welcomes articles from all over the world.
