

Scandinavian Journal of Disability Research

At a conference in Fredrikshavn in 1997 the Nordic Network on Disability Research was established. One of the purposes of this network was to publish a journal in English: *Scandinavian Journal of Disability Research*. Its main purpose is to disseminate results from social research on disability. 'Social Research' is – in this context – understood as a multidisciplinary field, including for example educational, sociological, socio-psychological, historical, legal, economical and socio-medical research. Its defining characteristic is a focus on the relation between persons with disabilities and their environments. The journal welcomes articles from all over the world.
